

## SECURITY SOLUTION INSTALLATIONS

The installation of any system, whether it be a single site or estate wide migration can be a complex undertaking, demanding a carefully planned, structured and systematic approach.

### 40 YEARS EXPERIENCE

We have developed a highly refined process for such installations. Proven in countless projects across diverse sectors, the process naturally varies according to each customers requirements, but the core disciplines are proven and common to all.

### DETAILED DESIGN

- Network design
- CCTV and lighting survey
- Access control survey
- Existing fence-line condition report
- Detailed reports
- FAT system setup and acceptance
- Confirmation of scope of works

### PROJECT MOBILISATION

- Pre-start meeting
- Health and Safety planning and documentation
- Resource planning
- Site setup

### PROJECT INSTALLATION

- Equipment procurement
- PIDS installation
- Network installation
- Cabling
- CCTV installation
- Access control installation

### SYSTEM COMMISSIONING

- PIDS commissioning
- Network commissioning and configuration
- Cause and effect matrix configuration
- CCTV commissioning
- Access control commissioning

### PENETRATION TESTING

- Black box assessment
- Infrastructure review

### SYSTEM HANDOVER

- Operator training
- O&M issue
- System handover
- Maintenance management

Reliance High Tech dealt directly with customers and councils very successfully, provided RAMS on time and met all project schedules, delivering each project on time with zero snags and zero harm.

Steve Johnson,  
Security & Emergency Planning Manager  
Affinity Water Ltd

## ONE STEP AHEAD OF EVERY CHALLENGE

Large scale security solution installations are complex and challenging by nature. A Security Systems Integrator with the experience to foresee and address the challenges and issues which will arise is an absolute essential.

We've been delivering security solutions to leading public, commercial, industrial and CNI organisations for more than 40 years. We know what issues are likely to arise, and we're ready to deal with them and prevent them.

Contact us today to find out how Reliance High-Tech could deliver the security your organisation needs.
